Dr. Jovan Simeon
Missouri Institute of Psychiatry
5400 Arsenal Street
St. Louis, Missouri 63139

Dear Jovan,

Enclosed is a copy of the thiothixene paper which I have corrected. Please edit this and return it. I have kept the original and will have Kathy correct it for Current Therapeutic Research if you approve. There are a few questions. I am also enclosing an earlier copy of the thiothixene report for you to see what was omitted or changed.

Please check Table I and tell me what to put in for patients 13 to 15 under results. On page nine, the first four sentences give a vague statement about EKG results. This should either be expanded to something meaningful or deleted. Please recommend.

Enclosed is your copy of the clinical laboratories paper as it was sent to the Journal of New Drugs. Please check the fluphenazine copy that Ali has.

Kathy sends best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
