Dr. Otto Schwartzkopf
Schwartzkopf Microanalytical Laboratories
56-19 37 Avenue
Flushing, New York

Dear Dr. Schwartzkopf:

As we discussed on the telephone, I am sending you by messenger two capsules, each presumably containing 20mgs of "Heroin Hcl. (pure) Recrystallized." We would like you to carry out such analyses of the chemical and physical properties of this compound as may be necessary to answer the following question:

What is the purity of this sample (what percentage of heroin does it contain)?

This note is an authorization to bill us up to \$100.00 for this analysis.

For your information, this sample was derived from a governmental agency and is part of a sample used in a study program at this college.

Thank you very much for your help.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
