Dr. J. S. Gottlieb, Director  
Lafayette Clinic  
951 East Lafayette  
Detroit, michigan 48207

Dear Jacques,

I was very pleased to receive your note regarding the studies in sex ratios related to work in this Department. The report presented to the Society of Biological Psychiatry is enclosed as well as a preliminary report on "The Influence of the Sex of Hospitalized Schizophrenics on Therapeutic Dosage Levels of Neuroleptics".

There have been some additional data derived from a predictive study in our clinic in which the sex of the offspring from schizophrenic mothers was predicted before childbirth. This study has been interrupted because the students are in the military service. Because the data both published and unpublished continues to be consistent, I have suggested that they prepare a report for the hypothesis section of *Lancet*. As soon as they have this completed we will send you a copy.

I look forward to hearing more about your studies.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
