Maspeth, New York

Dear Gene,

I have read the final report on the delayed release preparation for narcotic antagonists, and feel that much progress has been made. Surely, the effort should not be discontinued.

With this in mind, I have asked Dr. Freedman to file a copy with the New York State Narcotic Addiction Control Commission, and to enquire of the NIMH and SAODAP whether they have an interest in continuing this project. Meanwhile, I would suggest that you file such requests as you may wish with Dr. Bergner of New York or other agencies as may be available.

My thanks for your cooperation and interest in this important study.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
