Dr. Williamina A. Hinwich
Galesburg State Research Hospital
Galesburg, Illinois

Dear Williamina:

You were missed during the meetings of the Society of Biological Psychiatry, but we were all pleased to hear that you and Harold were in Europe.

One of my associates, Sam Gershon, heard the report given in Chicago at the Federation meetings, and has asked whether we can obtain a copy of your paper. For the past few months we have considered recording our EEGs, using a telemetric apparatus, and at the present time have found no one who is satisfied with his equipment or techniques. Apparently, you have been successful and I would be pleased to know more of the details of your recording equipment, and the electrodes specifically.

I trust your trip has been a successful one.

Sincerely yours,

Max Fink, M.D.
Director
