

August 22, 1968

Dr. Turan M. Itil
Missouri Institute of Psychiatry
5400 Arsenal Street
St. Louis, Missouri 63139

Dear Turan,

I very much enjoyed my visit and have completed some of the things on my agenda. Grass Instrument will ship two amplifiers and they should arrive early next week.

Dr. Barry is coming to visit on Friday, August 23rd. He does not need a protocol but suggests that we take care of the full filing with the FDA ourselves. As soon as I have an IND number, he will ship the supplies of fluphenazine.

I have already dictated a letter to Sidney Merlis recommending you for Fellowship in the ACNP.

Enclosed are the bills for some of the computer time at the College. The lab scale - psychopharmacology bills represent one-half the costs to date. It would be most helpful if payment for these charges can be made to "Division of Biomedical Information Processing - New York Medical College" and sent to Dr. Donald Shapiro at 5 East 102nd Street, New York, New York 10029.

I am also enclosing a statement for my visit that is appropriate.

My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
