Re: Subject: 07249-03
Supplement

Dear Jonathan:

Enclosed is our application for a supplement to the EEG and Human Psychopharmacology program for an eighteen month period from the period April 1, 1965. This supplement will cover the full period of support of 07249 and, as I stated in the first page of the application will permit us to complete the computer trials for this program. It is my belief that the present program using frequency analyzer data will give us answers originally postulated by the Committee, but this computer program will make these answers much more definitive.

If the application appears complete, I would appreciate your sending it through the usual channels.

Sincerely yours,

Max Fink, M.D.
Director
