Dr. J. Alan Burdick
University of Manitoba Faculty of Medicine
Winnipeg 3, Manitoba

Dear Dr. Burdick,

My associates and I have considered your suggestion of a chapter in your volume, "Quantitative EEG Analysis", and were left with a few questions, the answers to which would assist us in defining our contribution.

1. The chapter titles already approved and their authors;
2. Publisher and publication date;
3. The intended audience and the secondary audience; and
4. the contract specifications for contributors.

It would also be helpful for us to know from which point of view the volume is being written, i.e., historical, technical (primarily methods?), applications, or ???

Thank you for your invitation. There is a need for such a volume. I recall that Paul Naitoh had planned such an effort and I have not heard of the outcome. We believe such a venture to be interesting, and would be pleased to assist in its development.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
