

June 3, 1963

Dr. George A. Ulett
Division of Mental Diseases
722 Jefferson
Jefferson City, Missouri

Dear George:

Would it be possible for the records at Jefferson City to be culled for the following information?:

1. How many patients with a diagnosis of manic depressive disease were in residence in the hospitals of the Division as of some date in 1962 (January, 1963)?
2. From the records is it possible to determine the number of patients with the diagnosis manic depressed - manic and/or manic states? If so, I should like to know how many with this diagnosis were in residence.
3. Is it possible to estimate the number of admissions with manic diagnosis per year in the five hospitals?

Sincerely yours,

Max Fink, M. D.
Director
