RE: High Dose Fluphenazine  
IND 5210

Dear Turan,

I have been asked for a progress report on our studies of high dose fluphenazine by the FDA. Enclosed is a copy of their letter and my reply.

As I understand, we have terminated studies of high dose fluphenazine in this country, and that the supplies from our special formulation are exhausted. To complete the records at the FDA, I would appreciate your sending copies of the reports from Missouri and Istanbul reflecting on these experiences. These should be sent to Dr. Gardner.

Many thanks.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
