Dr. Robert Knights  
Carleton University  
Ottawa, Canada

Dear Dr. Knights,

Following your letter, I called Donald Cheetham at Smith, Kline & French Laboratories and recommended he get in touch with you, when and if, they decide to go ahead with the evaluation of the UCB compound.

I have read your reports and have found them most interesting. I have sent them on to my associate, Dr. Rhea Dornbush, for her information.

Our study in Athens seems to be 'off the ground' and may yet fly.

Good luck in the studies in Jamaica. Perhaps, on your next trip through New York, you would have the time to visit with us ? (212-369-7900).

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
