Dr. Allen P. Borger  
Associate Director  
Department of Clinical Research  
Chas. Pfizer & Co., Inc.  
Groton, Connecticut 06340

Dear Allen,

Enclosed are two copies of the study "Assay of Oral Concentrate and Capsule Drug Dosages by Quantitative EEG Criteria."

We have begun the data collection this morning and will run through Saturday of this week.

Since the meeting of the FDA is not until next Thursday, I believe you will have more material with second trials as of Monday afternoon. Our schedule calls for twelve subjects to be tested Monday-Thursday with their second testing on Friday, Saturday, Monday and Tuesday and their third testing during the remainder of that week.

Also enclosed is a letter regarding the review of the thiothixene oral concentrate NDA.

My best regards.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
