Dear Tom,

What a delightful review! Your review of SPYCATCHER as a study in alcohol consumption said so much that should be said, in an engaging manner, that I read and re-read it. I am writing to congratulate you on a fine job.

Alcohol abuse is so common in our population that it is a feature of fully half our admissions. Similarly benzodiazepine use is a feature of our middle aged patients.

In any case, your review was excellent, and I congratulate you on a fine analysis of modern political leadership.

My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry

P.S. It was good seeing you in Brighton. When next you come to New York, would you let me know? I would like my associates to meet you.
