Dr. Richard Hendrick
Arthur D. Little Co.
15 Acorn Park
Cambridge, Massachusetts

Dear Dr. Hendrick:

As we have discussed with Dr. Pars, I am sending you separately an ampule of THC with a request that it be analyzed for its content. This is one ampule of 50 that we received from Dr. Albert Manian and Dr. Daniel Efron of NIMH. The ampules were marked as containing 10 mg THC per 2 ml of 95% ethanol sealed under nitrogen.

In some of our recent trials we have had less of an effect than earlier and are anxious to determine if deterioration has occurred.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
