

March 25, 1969

Dr. Daniel X. Freedman
Professor and Chairman
Department of Psychiatry
University of Chicago School of Medicine
Chicago, Illinois

Dear Dan,

It is a pleasure to enclose reprints of our reports in the new volume edited by Dan Efron, recalling the splendid meeting of two winters ago. The assignment gave me great pleasure and has been rewarding in ideas for our continued research effort.

Recently I met your associate, Jack Green in our mutual roles as Chairmen of the Computer Committees of our respective facilities. His novel views of narcotic antagonists were of special interest. The differences in emphasis between our Department under Al Freedman and the existing facility at Mount Sinai became grossly apparent. Dr. Green seems to be involved in the selection process for a new chairman, and is less acquainted with the research and community action programs fostered by Al than would be desirable. In your discussions, a description of these programs, from your vantage point, may be mutually useful.

My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
