Dr. Julius Korein  
Dept. of Neurology  
N. Y. U. School of Medicine  
550 First Avenue  
New York, New York

Dear Julie,

I would appreciate a copy of your recent report, "The Effects of Lithium on EEG, Behavior and Electrolytes", in the J.N.M.D.; and any other reports of your lithium/EEG studies.

I am sorry we did not meet at the Metropolitan EEG. Your technician asked many questions, reflecting an enthusiastic interest and an intimate experience with the problems of EEG and drugs. Give her my best regards, and my thanks for making the evening a challenging experience.

Thanks for the reprint.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
