30 January 1974

Frank M. Berger, M.D., D.Sc.
680 Madison Avenue
New York, New York 10021

Dear Frank:

I am pleased to enclose the reprint that you requested. You will be pleased to know that the use of EEG for identification and classification of new psychotropic drugs is being actively pursued in a number of industrial laboratories in Europe, including Schering in Berlin, Sandoz in Basel, Organon in Holland, and a laboratory in Genoa. I would be glad to discuss this work the next time we meet.

Best regards,

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
