Dr. Edgar Grunwaldt
Geigy Pharmaceuticals
Ardsley, New York 10502

Dear Dr. Grunwaldt:

Thank you for the ketimipramine placebo. You may recall that you asked that we discontinue ketimipramine in patients who have done well and have been on the medication for longer than eight weeks. To do so, we have put each one on ketimipramine placebo first and only those who do badly will receive imipramine.

The new protocol should be amended to give ketimipramine placebo at the end of eight weeks.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
