Dr. Hart E. Van Riper
Geigy Pharmaceuticals Division
Geigy Chemical Corporation
P. O. Box 430
Yonkers, New York

Dear Dr. Van Riper:

Some months ago, your laboratories were most kind in providing us with ampoules of Yohimbine Hydrochloride. We are in the midst of that study, and now find that replication is required and will need another supply.

At the original time of inquiry, I asked whether Geigy would be willing to undertake this operation at our expense. You were most considerate in providing us with the Yohimbine and in not submitting a statement of expenses. I am embarrassed to have need once again to call upon you.

I would be pleased if you would consider ampouling another supply of Yohimbine which we will provide. Can you undertake this at our expense?

Many thanks for your consideration.

Sincerely yours,

Max Fink, M. D.
Director
