August 16, 1978

Mme. Dahin Herbillon
Bruxelles, Belgique

Dear ~~Mmm~~. Herbillon,

I regret that the proceedings of the 1978 meeting in Vienna are not available as yet from the various authors. They are requested to submit their manuscripts to the editors in Vienna by the end of September, and I do not have copies from them.

However, you may wish to obtain copies of some recent reports on ECT which I have written to start you on your effort. The following are recent summaries which may be useful.

CNS Sequellae of EST: Risks of Therapy and Their Prophylaxis. In: Shagass, C. et al (Eds.): Psychopathology and Brain Dysfunction, N.Y., Raven Press, 223-239, 1977.

EST: A Special Case in Pharmacotherapy. In: W.E. Fann et al. (Eds.): Phenomenology and Treatment of Depression, N.T., Spectrum Publ., 285-294, 1977.

Myths of "Shock Therapy". Amer. J. Psychiat. 134:991-996, 1977.

Efficacy and Safety of Induced Seizures in Man. Comprehens. Psychiat. 19:1-18, 1978.

Is EST a Useful Therapy of Schizophrenia? In: J.P. Brady and H. Brodie (Eds.): Controversy in Psychiatry, Phil., W.B. Saunders Co., 183-193, 1978.

In addition, I have just completed an extensive review of convulsive therapy and the volume will appear in January. It will be published by Raven Press in New York and will be the most extensive review available. If you can wait for it, I think you will be satisfied with the documentation of the facts about convulsive therapy.

My regards to Dr. Mendelwicz.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
