

May 5, 1985

Michael E. Miller, M.D.
515 W. 110 Street
New York City 10025

Dear Michael,

I have discussed your letter of May 1 with Dr. Henn, the Department Chairman. We are pleased that you are interested in working with us after your residency is complete in June, 1986. As I discussed during your visit, it is difficult to make a definite committment so long in advance, but we will be able to do so in October. We will ask that you visit us, and meet the relevant members of the faculty early in October, when we will be able to discuss the assignments and openings for July, 1986. We will arange that you meet Dr. G. Fricchione (C & L), Tom Craig (OPD), and Dr. Henn at that time.

Arthur Gabriel gave a good overview of the medical aspects of ECT at the teaching sessions held a few weeks ago at the Carrier Clinic. He must be impressed with your data as he quoted the findings as encouraging him to now use atropine in his treatments. How is the paper coming?

You should have a good experience at Columbia. Let me know how it went.

My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
