Dr. Howard L. Andrews  
Building 10, 1-B-37  
National Institutes of Health  
Bethesda, Maryland

Dear Dr. Andrews:

I have recently become interested in the problem of EEG patterns in narcotic addiction. In reviewing the literature, I found a number of reports of your studies. These appear to be the most definitive in the literature. I am writing today to request copies, if available, or citations of any additional studies that you have completed, but which we have not noted.

We are aware of the following:

Psychosomatic Medicine, 1941: 399-409;

Journal Pharmacology Experimental Therapeutics,  
1942, 76: 89-94;

Psychosomatic Medicine, 1943, 5: 143-147;

and, the National Research Council Reports  
of Committee on Drug Addiction 1929-1941,  
pages 1479-1490.

Thank you for your assistance.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
