Indianapolis 7, Indiana

Dear John:

I have just received a copy of the manuscript "Neurophysiologic Changes in the Brain of the Cat after Administration of a Weak and Strong Anticholinergic Hallucinogen" by Drs. Spradlin, et. al. I found the document to be complementary to the presentations of Drs. White and Gershon in the proposed panel, "Anticholinergic Hallucinogens" and would request permission to include one of the members of this team as a participant in this panel. If you concur, then I suggest that you withdraw the abstract and not consider it as part of the papers to be read individually.

Please confirm.

My best wishes for the New Year.

Sincerely yours,

Max Fink, M.D.
Director
