Dr. Lois Chatham
National Institute of Mental Health
5454 Wisconsin Avenue
Chevy Chase, Maryland 20015

Dear Dr. Chatham:

I am pleased to enclose a copy of the program of the special meeting on narcotic antagonists and a summary which we have just prepared for Science.

We have just expanded our cyclazocine program in a full clinical trial, hoping to treat 100 addicts in the next twelve months. While this number may not be large, it does represent an expansion of our ongoing program from a research model to a demonstration one. We will be seeking a way of insuring an independent clinical evaluation, and I will bring the NARA recording to the attention of Dr. Freedman.

My thanks for your patient and thorough explanation of PL91-211.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
