

July 3, 1963

Deputy Director
Bureau of Customs
Federal Building
1114 Market Street
St. Louis, Missouri

Dear Sir:

We have received, on June 26, 1963, Mail Entry #54738 from Germany. This consists of electrodes for electroencephalography. This material is to be used in the direct research programs of the Missouri Institute of Psychiatry. The Missouri Institute of Psychiatry is a component of the Division of Mental Diseases of the State of Missouri.

It is my understanding that medical instruments for use in a research center such as this may be admitted without payment of duty under existing regulations.

Payment was made, however, as requested by the Deputy Collector. A copy of the receipt is enclosed. We would appreciate your consideration as to whether this was proper. If not, we would appreciate reimbursement.

Sincerely yours,

Max Fink, M. D.
Director
