

May 23, 1968

Prof. Jean Bobon
Clinique Psychiatrique
Liege, Belgique

Dear Professor Bobon,

It was kind of you to consider my participation in the forthcoming "Interdisciplinary Week on Neuroleptics" in May, 1969. I would be pleased to participate, and look forward to doing so, subject to the vicissitudes of the present restrictions on the use of our funds for international travel. As you may have heard, since March 11, 1968 we have not been permitted to use any of the usual funds for such travel, and we will have to try to obtain new funds from other than our usual sources. As this is a new situation for us, I am unable to be optimistic at the present time.

I did enjoy meeting your son, who impressed me by his interests and by his facility in our language. We would be pleased to consider an application from him to continue his studies in our laboratories which are devoted primarily to studies of the effects of psychoactive drugs on the human EEG.

Again, my thanks for your kind invitation.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
