Hopital Universitaire Brugmann
4, Place Van Gehuchten
Bruxelles 1020, Belgium

Dear Julien,

Enclosed is a draft report, "ACTH 4-10 (Org OI-63):
Cognitive and Behavioral Effects in Hyperactive, Learning Disabled
Children", submitted by Dr. Judith Rapaport for your consideration
for publication in Neuropsychobiology. This report complements the
study submitted last week from my laboratory on the effects of this
compound in normal male volunteers.

Dr. Rapaport has used the same materials and has
worked from the same hypotheses that we did. As I indicated in my
letter, I hope that you may be able to consider these reports together.

My regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
