Ernest Hartmann, M.D.
Sleep Laboratory
Boston State Hospital
591 Morton Street
Boston, Massachusetts 02124

Dear Ernie:

I am writing to recommend Miss Carolyn Poinier, who is interested in continuing her education in Boston and may call you for advice as to a position as a research assistant. She graduated Colby College with excellent grades in June, 1972, and has been with me these past 18 months. She has participated in the work of this laboratory fully, including recording of EEG, processing of EEG using the IBM 1800, statistical analyses and behavioral evaluations during human experiments--all of these in male volunteers.

She is an attractive and charming girl with enthusiasm that is unmatched by any of the many young people who have worked for me. She is reliable and dependable, and I recommend her highly.

Should she call, I would be grateful for any advice you may give her for openings that may utilize her talents or broaden her experience.

My best personal regards and best wishes for a healthy 1974,

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry

MF/cis

P.S.--I have sent the same letter to Joe Tecce.
