

July 22, 1971

Prof. Alfred M. Freedman  
Chairman  
Department of Psychiatry  
New York Medical College

Re: Rhea Dornbush, Ph.D.

Dear Al,

Dr. Rhea Dornbush has done an exemplary job in all her assignments during her tenure in the Department since 1968, that I am pleased to recommend her promotion to *Associate Professor*.

Since joining our faculty in 1968, she has described the memory effects of unilateral and bilateral electroconvulsive therapy; the effects of acute cannabis inhalation on mood and performance tasks; developed the chronic cannabis study program, assuming all the responsibility initially assumed by Prof. Stanley Feldstein; and has established the liaison with some of our overseas collaborators.

I have found her knowledgeable, responsive, responsible, and an excellent co-worker, and recommend her promotion without reservation.

Sincerely yours,

Max Fink, M.D.  
Professor  
Director, Div. Biological  
Psychiatry
