Dr. James H. Satterfield  
Gateways Hospital  
1891 Effie Street  
Los Angeles, California 90026

Dear Jim,

I was pleased to receive your letter for I have known of Gateways Hospital for some years and am delighted that this fine institution will have your support. Knowing of its similarity to Hillside Hospital, I was pleased to discuss the development of research programs with the Ziskinds on many occasions during the past few years and was most encouraged by their forward looking point of view. Good luck!

I am pleased to enclose a few of the available preprints of studies recently completed. This work was done at the Missouri Institute of Psychiatry using the IBM 1710 - 1620 system which I established there.

I do not know of anyone using a link computer successfully in the analysis of EEG signals except its widespread use for averaging evoked potentials.

Please give my personal regards to both the Ziskinds when next you see them.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
