

February 28, 1967

Dr. Roy D. Waldman
USAF Hospital
Chanute AFB, Illinois

Dear Dr. Waldman:

Your letter of February 15 has been referred to me for reply. The Department of Psychiatry, New York Medical College, has embarked on a number of new programs based on the development of the first Community Mental Health Center. There are programs relating the care of in-patients and out-patients in conjunction with community agencies which call for additional staff. There are, therefore, openings in a variety of programs and it would be indeed helpful if you could plan a visit to this Center so that I and some of my associates may have an opportunity to meet with you so that we can discuss these programs.

If you are planning to be in New York in the next few weeks, please call my secretary at 212 369-7900 Ext. 248 collect.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
