Mr. Donald Cheetham  
Smith Kline & French Laboratories  
1500 Spring Garden Street  
Philadelphia 1, Pennsylvania

Dear Don,

Recently I called regarding a search through the Thorazine literature for mention of complications in relation to skin disorders. I am taking the liberty of enclosing the original letter from Dr. Guthrie to Dr. Kline. I would appreciate a similar search for the following terms.

bullous dermatitis  
eczematous dermatitis  
vescicular dermatitis  
dermatitis venenata  
bullous erythema  
bullous multiforme  
weeping eruption  
oozing eruption  
photo-allergic dermatitis  
pphoto-toxic dermatitis

with or without

vesciculation  
eczematization  
bullous reaction

I am acting as a consultant to the State of New York with regard to a case of this kind and I would appreciate all the help I can get in presenting a fair statement of the toxicity ascribed to Thorazine.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
