Professor P. B. Bradley  
The Medical School  
Birmingham 15, England

Dear Philip:

I have just received a letter from Dr. Richard White with some suggestions for the symposium. Most have been sent to you. He again recommends Dr. Giarman. Among clinicians he has suggested Drs. Ostfeld, Forrer and Goldner. I have checked the recent literature and find no publications showing their interest in the subject within the last four years.

He recommended, however, a name new to me, that of W. W. Baker. I am sending you a list citing some of his publications and a short summary of his curriculum vitae from *American Men of Science*. Perhaps you would want to consider him as one of the participants, and if so, I would be pleased to call him.

I hope these suggestions will be helpful.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
