Dr. Jacob Erik Steiner
Department of Applied Pharmacology
Hebrew University - Hadassah Medical School
and School of Pharmacy
Jerusalem, Israel

Dear Dr. Steiner:

My associate, Dr. Sam Gershon, and I have recently become interested in your technique for implanted electrodes in animals. He has recommended your method highly, as described in the EEG Journal, 1961.

I plan to be in Israel during the early part of August, and should be in Jerusalem on Monday and Tuesday, August 10 and 11. I would like to take the liberty of calling you when I arrive, in the hope that I might visit your laboratory for a short while and see your electrodes in some of your animals if they are available.

In the event that the electrodes appear as satisfactory as I anticipate, would you be prepared to supply our laboratory with a number of these for our use?

Sincerely yours,

Max Fink, M. D.
Director
