Dear Sir:

The Department of Psychiatry at the Missouri Institute of Psychiatry of the University of Missouri School of Medicine has recently established a documentation center for the mental health sciences. After a demonstration and study period, the principles of coordinate indexing were decided as the basis for this program. The document sources are the varieties of journals in the mental health field.

At the present time the program is being expanded and additional abstracters, documentalists and similar personnel are being sought.

We would be pleased to have you submit your curriculum vitae, if this opportunity appears of interest to you.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
