Morris B. Bender, M.D.
Professor & Chairman
Department of Neurology
Mount Sinai Hospital
100 Street and Fifth Avenue
New York City 10029

Dear Morris,

Congratulations on your election to the Presidency of the ANA ! It seems like so many years ago that we attended the meetings of the Association and found its discussions so rewarding. There are times when I regret that my path for research led me away from the sure diagnoses in neurology and the clear images of the PEG and the arteriogram. Surely, the squiggles of the EEG are a far cry from the images on the x-ray.

But, I am also writing to congratulate you on your address-- which was reported to me as a *tour de force*. To have found an understanding of acupuncture in DSS is magnificent, and should the ensuing research prove your hunch to be correct, it will provide a new impetus to the research you so ably fostered.

My regrets at not attending the meetings in Chicago-- I hope that we will be able to meet again under such favorable conditions.

My best regards to Sarah.

Sincerely yours,

Max Fink, M.D.

P.S. Thinking of the past reminds me of the Israel Strauss lectures--
Have these been discontinued ?
