

July 12, 1965

Mr. Robert Goldman  
Vice President, Research  
Nysco Laboratories, Inc.  
34-24 Vernon Boulevard  
Long Island City, New York 11106

Dear Mr. Goldman:

I am pleased that we can undertake this trial of papaverine and ethaverine as you requested.

The easiest way for this laboratory to establish the cost of any study is on a fee for each EEG record requested. In this way, the study can be made larger or smaller based upon the statistical needs of the user. For studies of this kind, a single fee of \$115.00 per record would include the recording, fees for the subject, computer analysis, and the statistical analyses as may be necessary at the end of the study.

I hope this will be satisfactory, and look forward to working with you.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
