

Letter

September 30, 1975

M. A. McAllister, M. D.
Corresponding Secretary
American Board of Electroencephalography, Inc.
3101 Kyle Avenue North
Golden Valley, Minnesota 55422

Dear Dr. McAllister,

I am pleased to support the application of Dr. Gerald Perry as a qualified electroencephalographer.

I have known of his work for more than 20 years, for he was active in clinical practice of psychiatry and EEG when I first came to the North Shore of Long Island. He is a fine clinician, and an excellent neurologist. As part of his practice, he has maintained an active interest in clinical EEG, being one of the principal consultants in our community.

Lately, I have collaborated with him in a research study in which EEG measures are integral, and I have found his work most helpful and his cooperation excellent.

I recommend him without reservation.

Sincerely yours,

Max Fink, M. D.
Professor of Psychiatry
