

December 9, 1965

Dr. Henry Brill
Pilgrim State Hospital
Box 22
West Brentwood
Long Island, New York

Dear Henry:

Since returning from Washington, I have had an opportunity to discuss with Dr. Itil, my associate, your interest in the treatment of chronic schizophrenics. Since we have already collected some data and are in the midst of this project, we would be pleased if we could have your advice in the continued development of this program.

We would be pleased if you would have an opportunity to visit our Center and to discuss our program.

To make this more meaningful I am taking the liberty of enclosing the outline of our project, some of the reports which have already appeared, and two abstracts of papers that are being prepared.

We would be grateful for any comments you care to make.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
