Dr. Nathan Kline  
Director of Research  
Rockland State Hospital  
Orangeburg, New York

Dear Nat:

It was a pleasure to read in the latest issue of Medical Tribune of your work in underdeveloped countries. I had not fully realized the growth of this program until I spent an evening with Heinz, and he described, with a great deal of feeling, his interest in your work. It was my comment then that this effort was the most novel, and the most commendable, program to benefit the mentally ill that has come from the United States in many, many years. Congratulations!

I did not know that you had established a committee, but I should be pleased to contribute to its work in any way that I can.

At these new laboratories, I am responsible for the residency training program. This is accredited for three years, and I would be pleased to consider foreign graduates for appointments as residents or special fellows if you think that work with us would be of any help.

Again, my congratulations and best wishes for your continued success.

Sincerely yours,

Max Fink, M.D.  
Director
