Mr. Herman Weissman  
Hoffman- La Roche Inc.  
Nutley, New Jersey 07110

Dear Hank,

Enclosed is an original, unbound copy of the report summarizing our experiences in assessing the EEG profile of bromazepam and its comparison with diazepam and placebo; and the blood level correlations. I am also enclosing three bound copies for Phil Bookman and other associates.

Please be advised that the original data of the EEG assessments, behavioral observations, and subjective data are in our files and may be made available at your request.

I want to take this opportunity to thank you and your associates for your cooperation and patience during this study. I believe we have made some progress in characterizing the pharmacology of these compounds, and in the process, we have learned a great deal about our methodology.

My personal regards.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
