Dr. Richard P. White
Associate Professor of Pharmacology
Department of Pharmacology
The University of Tennessee
Memphis, Tennessee 38103

Dear Dick,

It was good to hear from you and I am pleased that the study is going well.

This study program is supported by MH-12567 (Pharmacotherapy of Narcotic Addiction) and by funds of the New York State Narcotic Control Commission.

I am enclosing copies of all the reports which may be relevant. Additional citations may be found at the end of the naloxone study.

While I can sympathize with your need to obtain more data, perhaps I can make some contribution if a preliminary draft were made available before the June meeting. At least would you call me at your convenience and perhaps we can discuss your progress in that fashion?

My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
