

February 1, 1967

Dr. Betty Miner
Assistant Professor of Sociology
University of Nevada
Reno, Nevada

Dear Dr. Miner:

Dr. Nathaniel H. Siegel has suggested that I get in touch with you with regard to a position in this Department.

The Department of Psychiatry has accepted the responsibility for expanding its clinical program to establish a community mental health center under the national guidelines. As part of this program, a number of novel treatment facilities are being established to bring a variety of treatments to the community. The Department, however, is equally anxious to evaluate each of these programs and so an effort to evaluate is built into each new project. Evaluation methods are still primitive, and so even the methods require study. For such programs, we are interested in scientists with your background.

If this opportunity interests you, I would appreciate a copy of your curriculum vitae and copies of any of your publications which may be available.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
