

November 12, 1970

Dr. William Karliner
20 Franklin Road
Scarsdale, New York

Dear Bill,

For more than two years we have been guests at Gracie Square, and with your splendid cooperation, have completed the mission set for us - to compare unilateral and bilateral ECT. Your special tolerance and cooperation has made this study possible, and I am deeply indebted. Four reports are completed - two are in press and our overall report, as submitted to the Archives, is enclosed.

Because the next phases of the study require special control of the cases, we are moving the study to Metropolitan and Kirby (Manhattan State) Hospitals.

Dick, Rhea and my other associates join me in expressing our thanks.

My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
