

November 13, 1964

Professor Sanshi Abe
Dean of Hokkaido University
School of Medicine
Sapporo, Japan

Dear Professor Abe:

Dr. Kazuo Saito of the Department of Public Health at Hokkaido University School of Medicine has applied for an appointment at this research and training center as a research fellow in neurophysiology. He has suggested that we write to you for additional information.

We would be grateful for any comments you may wish to make regarding Dr. Saito's experience, his ability to relate to his co-workers, and any talents that he may have exhibited during his experience with you. As you may guess, we are particularly interested in his ability to relate to members of our staff, so that his language ability is an important determinate.

Insofar as the programs in research at this center are dedicated to evaluating the changes in brain physiology associated with various changes in the treatment process of the severe mentally ill, much of Dr. Saito's work will be in clinical and experimental electroencephalography. Any comments that you may wish to make regarding his ability in this type of work would be appreciated.

Thank you very much for your cooperation.

Sincerely yours,

Max Fink, M.D.
Director
