Dr. Michael G. Saunders
President, Central Association
of Electroencephalographers
The Winnipeg General Hospital
700 William Avenue
Winnipeg 3, Manitoba, Canada

Dear Mike:

Thank you very much for the invitation to organize a meeting for the Central EEG Society. As you know, I am a newcomer to St. Louis and before accepting your invitation I took the opportunity to discuss it with Dr. O'Leary. He had some excellent suggestions, the chief of which was to inquire as to the feasibility of holding a joint meeting with the Eastern EEG Society. Before going ahead, I wonder if you would be willing to inquire from the President of the Eastern EEG Society as to the feasibility of such a joint meeting, and if so, whether they would like to establish a joint program.

I have never attended a meeting of the EEG Society, so I do not know the general range of interest. As I have made some inquiries here I have been told that most of the members are clinical electroencephalographers and that a program with emphasis on neurophysiology or animal studies would probably not be as welcome as one based on clinical and office EEG. Is this your impression of the Society?

Please advise me. My best regards.

Sincerely yours,

Max Fink, M. D.
Director
