Dr. David Lehr
Department of Pharmacology
New York Medical College
New York, New York

Dear Dr. Lehr:

While I very much enjoy my membership on the Research Committee, I find it difficult to attend the scheduled meetings with sufficient regularity to be an active participant. In discussing this problem with Dr. Freedman, I suggested, and he concurred in asking you to appoint an alternate from our Department.

We would recommend Dr. Arthur Zaks as alternate to the Committee on Human Research; and Dr. Richard Abrams, to the parent committee. If you agree, I will continue to attend whenever possible, asking the alternates to accompany me when they can, and to replace me when I cannot.

If this recommendation is unacceptable, I would be grateful for alternate suggestions.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
