A. Arthur Sugarman, M.D., Med. D. Sc.  
Chief, Investigative Psychiatry Section  
New Jersey Neuro-Psychiatric Institute  
Box 1000  
Princeton, New Jersey

Dear Arthur:

I am writing with some regret that Dr. Don was suddenly called away to England because of illness in his immediate family, and has canceled his trip to the East. I am grateful for your willingness to show him your facilities, and I hope that he will have an opportunity to visit with you sometime next spring.

I heard much of your EEG program in Vienna. There are a number of new centers which are developing frequency analytic methods for the study of EEG changes with drugs. Some are emphasizing the changes seen with brain tumors. In either instance, they have given reference to the kind of work that your laboratories are now carrying out. Keep up the good work!

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
