

December 26th, 1972

Paul Kielholz, M.D.,  
Psychiatric Clinic of the University,  
Basel, Switzerland.

Dear Paul,

I very much enjoyed our discussions in San Juan, and your enthusiasm made the dinner at the Swiss Chalet a memorable one.

As we are now preparing a study of acute withdrawal in cannabis, I read your comments to the WHO in 1971 and in the 1970 issue of Deutsche Medizinische Wochenschrift (95: 101-105). The paragraph on withdrawal (pg 104) is most interesting. Have you a more detailed description of the behavior of the subjects during withdrawal that you may make available to me?

In checking for the 1972 WHO report, I find it is not yet available in New York. Should there be data or comments from that meeting that are relevant to our interest, I would be most grateful for your making these available to me.

My best wishes for a happy and prosperous 1973.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
