

73SB-598

April 2nd, 1973

TO: Leonard E. Meiselas, M.D.

FROM: Max Fink, M.D.

SUBJECT: Consent form

1. The "EEG and Human Psychopharmacology" protocol submitted earlier specified that subjects must be 21 years of age or older. In the event that there is any other designation, please accept this note as a revision to indicate that no subject under the age of 21 will receive drugs in this program under these protocols.

2. It is with some regret that I face once again the critical suggestions of the English language of the consent form. I have accepted these modifications on the assumption that the remainder of the form meets with the critical approval of the Committee; and I trust that this modification is satisfactory. We need not allow space for signature of parent or guardian, since this is not essential.
